- **Fundraising committee takes action!**
- **Students prepare for the FLL invitational on November 14**
- **Tree planting has been postponed until further notice.**
- **Team 1013 earns several thousand dollars in grant money!**

Phoenix News

Team 1013 and the Lego Community

Traditionally, FRC Team 1013 hosts the FLL East Valley Regional on their home turf; this year is no different.

Currently, Team 1013 members are preparing for the regional by building multiple field sets and organizing the multitude of tasks that are required to run the regional. In addition, stu-

dents are setting up a separate day for all East Valley FLL teams to come to the high school and have a practice competition (an invitational).

The Phoenix's influence in FLL doesn't stop there, though. Team 1013 plays a more direct role the organization as well; Team 1013 both sponsors and mentors

five FLL teams in the Queen Creek community.

There is much anticipation to see what the FLL students have come up with for this year's Smartmove.

Show Me the Money

Team 1013 has sponsored five First Lego League teams to participate in this year's competition. Three of those teams come from Queen Creek Middle School, and the other two from Newel Barney Junior High. In the beginning, things were chaotic, but the mentors quickly turned things around to make sure things ran more efficiently. We as mentors split their teams up into three

groups: projects group, programming group, and the build group. Each part is very important to the competition as a whole. The individuals in project have a very important task of researching a community on a transportation issue, and then come up with a innovative solution. The build group much think together to come up with different ways of completing this year's tasks .

They then take their ideas to the programming team and they come up the movements of the robot. Each individual who dedicated their time to the FLL program is a vital part of the program, and we thank and congratulate them thus far.
